EDUCATION

The Ohio State University/Max M. Fisher College of Business **Columbus, OH**
Bachelor of Science in Information Systems, GPA: (3.97/ 4.00) | Dean's List *Dec 2026*
Relevant Coursework: Business Analytics: Data Management, Statistical Techniques, Data Structures & Algorithms

SKILLS & CERTIFICATES

Data Science & Engineering: SQL, Python, R (Tidyverse), Java, GIT, ETL pipelines, API integration, data wrangling
Analytics & Machine Learning: scikit-learn, NumPy, pandas, SciPy, matplotlib, EDA, feature engineering, regression modeling, forecasting (ARIMA), A/B testing, statistical analysis
Business Intelligence & Engineering: Tableau, Power BI, Excel (PivotTables, XLOOKUP), MySQL, BigQuery, Databricks
Certificates: Google Data Analytics Professional, AWS Certified Cloud Practitioner, Microsoft 365 Certified

PROFESSIONAL EXPERIENCE

Indiana Pacers Sports & Entertainment **Indianapolis, IN**
Data Analyst Intern *Jan 2026 – Apr 2026*

- Developed a Poisson regression model to forecast single game ticket demand and deliver dynamic pricing recommendations across Indiana Pacers, Indiana Fever, and Gainbridge Fieldhouse events.
- Eliminated weekly manual reporting overhead by migrating 3 recurring Excel reports to automated Databricks and Tableau pipelines, standardizing outputs and improving turnaround time for the Analytics team.
- Conducted NBA Draft prospect analysis by aggregating and visualizing advanced player metrics in Python and Tableau to support front office scouting and roster evaluation

Aizen LLC **Columbus, OH**
E-Commerce Data Analyst *Mar 2022 – Dec 2025*

- Engineered KPI dashboards in Excel and Tableau tracking sales trends, inventory turnover, and customer retention across product lines, enabling more responsive pricing and marketing decisions.
- Designed and executed A/B tests on product listing layouts with rigorous statistical significance testing, driving a 9% lift in click-through rate and measurable monthly revenue growth.
- Wrote SQL queries to extract and segment sales and customer data from multiple sources, used Excel for pivot tables, XLOOKUP, and trend analysis to identify patterns that improved repeat purchase rate by 7%.

PROJECTS

Predictive Sales Forecasting & Monetization Analytics - MySQL, R, ARIMA, Tableau:

- Constructed an ETL pipeline in MySQL and R processing ~850K game sales records from the Steam API and Kaggle to surface top performing genres, platforms, and high value customer segments
- Developed ARIMA time series forecasting models projecting 3.8% YoY growth and $1.2M in potential revenue uplift from high value players; delivered findings via a stakeholder facing Tableau dashboard

NBA Game Outcome Prediction (Team Lead) – Python (pandas, NumPy, scikit-learn, matplotlib):

- Led a four-person team building an ML web app predicting 2025–26 NBA game outcomes; engineered features from 10,000+ historical games and trained linear regression models to forecast team scoring and matchup results.
- Deployed an interactive site for users to explore schedules, compare predicted scores, and view win probabilities for upcoming games.

Portfolio Optimization & Risk Analysis – Python (pandas, NumPy, SciPy, yfinance, FRED API):

- Engineered a Sharpe ratio Modern Portfolio Theory optimizer ingesting 5-year asset price data via yfinance and the 10-year Treasury rate from the Federal Reserve API to model risk adjusted returns.
- Applied SLSQP constrained optimization to maximize portfolio efficiency and visualized optimal allocation weights alongside a simulated one-year performance trajectory.

LEADERSHIP & PROFESSIONAL DEVELOPMENT

Big Data & Analytics Association – Data Science Track Lead - Designed and led the Data Science curriculum for 100+ students across Python, EDA, statistical modeling, and visualization; coordinated semester long team projects showcased at the BDAA Research Gala.
HackOHI/O 2025 – SeeWithYou (4th Place out of 50+ Teams) – Developed a navigation app for visually impaired users leveraging AWS Rekognition, Apple LiDAR, and AWS S3 to analyze images and deliver text-to-speech feedback describing objects, distance, and direction.
